DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 and 27-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest reference, McIntyre et al. (US 6,272,113), teach a network controller system including multiple network ports and a driver system that operates the network ports as a team. The driver system commands network ports that are already in a team to send a heartbeat packet to test each other heartbeat port and the remaining ports to determine the status of functionality of the receiving ports in the team.

However, regarding claims 1, 14, 21, 23, and 28, McIntyre et al. fail to teach the claimed features of:

The driver system determining which of the network ports can be combined together to form a team having a common team network address to be used by external network logic, the driver system causes all of the plurality of network ports not currently operated as part of a team to transmit test packets to all other ports to determine whether the non-teamed ports can be combined in a team.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
